CAREER OBJECTIVE

Motivated and adaptable Software Engineer with a strong interest in front-end development. I bring hands-on experience with JavaScript, Java, PHP, HTML5, CSS3, TailwindCSS, ReactJS, ReduxJs and SQL, along with a solid foundation in software design, analysis, and problem-solving. I am seeking an opportunity where I can contribute to building clean, user-centered digital solutions while continuously developing my technical skills. With a proactive mindset, strong teamwork abilities, and a drive to learn, I can join a Scrum team and function effectively. I aim to add value to an innovative and growth-oriented organization.

EDUCATION

MASTER OF SCIENCE WITH MERIT

2024 - 2025

Computer Science

University of Kent, Kent, United Kingdom.

BACHELOR OF ENGINEERING WITH GPA 2.8

2019 - 2023

Faculty of Engineering , Major in Survey Engineering and Geographic Information

Kasetsart University, Bangkok, Thailand

WORK EXPERIENCES

PROVINCIAL ELECTRICITY AUTHORITY, THAILAND

JUN 6, 2022 - JUN 17, 2022

POSITION : GEOGRAPHIC INFORMATION SYSTEM PLANNING DEPARTMENT

- Gained an understanding of each department in the Electrical System Mapping Division, and prepared an internship plan to present to the Head of the Geographic Information System Planning Department.
- Prepared a map of the Provincial Electricity Authority Headquarters building.

PROVINCIAL ELECTRICITY AUTHORITY, THAILAND

MAY 20, 2022 - JUN 2, 2022

POSITION : GEOGRAPHIC INFORMATION SYSTEM DATA DEPARTMENT

- Recorded data for the 115 kV transmission line system through the team's GIS portal to support the improvement and layout of new 115 kV power lines.
- Improved and generated the department's flowcharts to support operations
- Created maps in ArcMap according to requirements using internal data and prepared them for customer delivery.
- Enhanced departmental software by integrating plug-ins to import satellite images or Google Maps to ensure map accuracy with real-world data.

PROVINCIAL ELECTRICITY AUTHORITY, THAILAND

MAY 3, 2022 – MAY 29, 2022

POSITION : GEOGRAPHIC INFORMATION SYSTEM DATA DEPARTMENT

- Imported data from SAP into ArcMap, utilized the software's tools in data preparation, and generated data quality reports and GIS indicators using prepared data according to the required format for the department head.
- Practiced using SAP to find and filter data

PROVINCIAL ELECTRICITY AUTHORITY, THAILAND

APR 18, 2022 - APR 29, 2022

POSITION : GEOGRAPHIC INFORMATION SYSTEM TECHNOLOGY DIVISION

- Conducted testing of the response speed for the Trace and Balance Load functions to ensure fast operation.
- Monitored the readiness of the GIS system by tracking the number of license usage across all 12 electricity authority areas.
- Studied and conducted performance inspections of the SATLAB satellite location device in conjunction with the PEA GIS Portal application for surveying purposes.
- Performed GIS access rights management.
- Monitored the usage of GPS car tracking for power failure repair vehicles nationwide and coordinated issue resolution

PROJECT

Whondo Student Rental Web Platform

Tech: Front-End: JavaScript(ES6+), Web Components, HTML, CSS, Shadow DOM

GitHub: github.com/Taghunter98/Whondo

- Built a modular front-end using custom Web Components and Shadow DOM
- Implemented form validation, password strength meter, image upload preview, drag and drop, carousel
- Integrated front-end with authentication and email verification APIs
- Collaborated using GitHub in an Agile (Scrum-inspired) workflow

Bill Splitter (Work in Progress)

Tech: Front-End Developer: React.js, Redux Toolkit, Tailwind CSS, Vite

GitHub: github.com/mosetz/bill-splitter

Description: React-based application that accurately divides restaurant bills by person or by item. The app supports service charge, VAT (included or added), discount rules, allocation logic, and fair rounding to ensure totals match receipts. Core calculation logic is modularized and validated with unit tests.

E-Plant Shopping

Tech: Front-End Developer: React.js, Redux Toolkit, Tailwind CSS, Vite

GitHub: github.com/mosetz/e-plantShopping

Description: Built a shopping application with React and Redux Toolkit for state management, Implemented product listing, dynamic cart updates, and reusable component structures.

Conference Event Planner

Tech: Front-End Developer: JavaScript (ES6+), HTML5, TailwindCSS

GitHub: github.com/mosetz/conference_event_planner

Description: Built an interactive event planning app where users select venue, add-ons, and meals with real-time total cost calculation.

Health-Care System

Tech: Front-End Developer: JavaScript (ES6+), HTML5, CSS3, PHP | Back-End Developer: SQL

GitHub: github.com/mosetz/Health-Care

Description: A web application demonstrates basic healthcare workflows such as moving (reassigning) appointments between staff and deleting prescriptions (CRUD workflows) .

Profolio Website

Tech: Front-End Developer: JavaScript (ES6+), HTML5, TailwindCSS

GitHub: github.com/mosetz/my-portfolio

Description: Responsive single-page portfolio showcasing projects and skills.

SKILLS AND QUALIFICATIONS

Technical Stack

Languages: JavaScript (ES6), Java (OOP), PHP

Web: HTML5, CSS3, TailwindCSS, React.js, Redux.js | **Database:** SQL

Version Control: Git, GitHub

Technical Software: VScode, IntelliJ IDEA, Eclipse IDE, Post man, Jira, Figma, Git/GitHub, Notion, Microsoft word, Power Point

HardSkills: Agile (Scrum) methodology, Software Development, analysis and design, Unit testing

Soft Skills : Strong verbal and written communication skills, Interpersonal Skills, Negotiation, Teamwork and Collaboration, Time management, Adaptability, Flexibility, Critical thinking, Attention to Details, Problem Solving, Patience, Positive Attitude and Enthusiasm.

Languages : Thai (Mother Tongue), English : Fluent (CEFR C1 – IELTS 7.0 equivalent, Heriot-Watt University Pre-Sessional English Programme) and Developing skills in a third language to work with a dynamic team in a fast-paced environment.
